Full-stack developer focused on building software with AI. Four years in tech, working with international clients since seventeen. Bilingual English (C2) and Spanish (native).

## EXPERIENCE

---

**Freelance Full-stack Developer** · Self-employed Apr 2026 – Present

- Building web sites and applications with Next.js, TypeScript, Supabase, and Cloudflare.
- Designing custom solutions that mix code with automations and integrations.
- Bringing product judgment beyond the technical side: SEO, online presence, and what looks good.

**Frontend Engineer Intern** · Grid Dynamics Jul 2025 – Sep 2025

- Three-month internship at a multinational headquartered in San Francisco, reporting to a senior mentor.
- Worked through the frontend curriculum: deep JavaScript, modern CSS, API architecture, and security fundamentals.
- Learned how a software company operates at scale: async reporting and mentorship from senior devs.

**Cashier / Barista** · Steamboat Resort, Colorado Dec 2025 – Apr 2026

- Customer service in a high-volume dining environment under a J-1 work-and-travel visa.

**Freelance Video Editor** · Self-employed Jun 2021 – Dec 2024

- Edited 500+ videos for US clients (YouTube long-form, reels, podcasts, ads). Backed by 130+ five-star reviews.
- Ran a small team of editors, managing client material and keeping quality consistent across deliveries.
- Built long-term client relationships in English, handling deadlines, feedback, and scope.

**Front Desk Agent** · Viceroy Snowmass, Colorado Dec 2023 – Apr 2024 · Dec 2024 – Apr 2025

- Guest services at a luxury resort across two consecutive J-1 seasons.
- Awarded J-1 Employee of the Season (2024–2025) for performance and guest service.

## EDUCATION

---

**Bachelor's in Computer Science** · UAA Mar 2024 – Dec 2026 (in progress)

**Associate's in Programming** · UTN Feb 2022 – Jul 2024

## PROJECTS

---

**Hivemind** — AI-powered second brain on Telegram. Reads, summarizes, and classifies URLs into a semantic knowledge base. Stack: Raspberry Pi, n8n, Gemini, Supabase + pgvector, Obsidian. Running at \$0/month.

## SKILLS

---

<b>Languages</b>	TypeScript, JavaScript, Python, Java, SQL, HTML/CSS
<b>Frameworks</b>	Next.js, React, Astro, Node.js, Express, Angular, Tailwind
